The Chinmaya International Foundation (CIF) is a crown jewel among the spiritual organisations of this country, nestled in the green carpet of a valley surrounded by hills in the Ernakulam district of Kerala, God’s own country. It is here that Śrī Ādi Śaṅkara, the spiritual commander who changed the destiny of humanity was born, in his mother’s home at Veliyanad. The name of the village ‘Veliyanad’ denotes the birth of the light that removed the ignorance of humanity! A nearby town is called ‘Piravom’ meaning the birthplace of a leader of spiritual odyssey who had an urgency to complete his avowed pursuit as quickly as possible.

Pujya Gurudev Swami Chinmayananda a great spiritual visionary saw the divinity whispering in this remote birth place of Śrī Ādi Śaṅkara and wanted that whisper to become a clarion call to the universe. He envisioned CIF that could bridge the gap between the East and West, pundit and public, science and spirituality.

We are living up to that great standard set by these two masters. We are reaching out to thousands of students across the globe through our online and postal courses. We are conducting regular camps which attract hundreds of students and our penchant to appease spiritual thirst is growing unabated.

Then came the corona pandemic like a bolt from the blue which changed the mindset of human beings. It is a real testing time. We faced the brute bravely and decisively. We started many online programmes and reached thousands of them with new awareness campaigns which are not entirely spiritual. By this, we could recruit many new aspirants. They showed keen interest in these eternal teachings that has stood the test of time, like the Himālayas and the Ganges of our country have.
Social media and digital technology are blessings for us, so that we are not mentally isolated. Humanity is connected using a single thread called social media. We reach thousands of you through the tips of your fingers, vibrations through earphones and videos that stun you with their exalting content. Spirituality, the science of peace and tranquillity, now reaches everyone in the comfort of their homes. We continue to have our robust publications wing, which is a treasure trove of more than a hundred print and digital materials based on Indic Knowledge Traditions.

You may be surprised to know that the most astounding and innovative ideas have dawned to us during these days of confinement. We have started an ingenious Sanskrit Course for beginners by Swami Ramakrishnananda. We had many problems transporting accessories to his place, which is in another state. It is a joy that we did it. The adverse circumstances are enticing us to take up daring new experiments. It is all for you. We want you to be blessed with this knowledge and help you beat the perennial ignorance that is bothering you.

We can only live with nature. At CIF, we have been very successful in growing our own vegetables and getting connected with nature by undertaking conservational measures like water harvesting and soil conservation.

Stay safe during the corona outbreak. Avoid touching your face because it is through our orifices that the virus enters our body. Wash your hands like a mad person. You will be alright.

Advaita Makaranda is a prakaraṇa grantha authored by Śrī Lakṣmīdhara Kavi, a disciple of Swami Anantananda. A prakaraṇa grantha is a foundation text that teaches the basics of Advaita Vedānta. Pūjya Guruji summed up the basic principles of Vedānta in a simplified manner and explained the various steps that Vedānta enjoins on a seeker to attain Liberation. The first session was followed by a group discussion.

Swami Advyanananda gave a lucid discourse on Vedānta which is the ultimate knowledge and can be presented in great detail. But here, Vedānta is decoded in a unique and concise manner in one verse, half a verse, three words, one word, and its truth that is truly beyond words.

The camp was an uplifting and an enlightening experience for the campers, and as its name suggests, took them a step closer to Self-realisation.

Chinmaya International Foundation and School of Vedic Maths conducted the 11th annual Vedic Mathrix 2020 Camp, based on ancient Indian Mathematics. Forty-three participants from three countries had joined, where the youngest participant was 11 years old and the oldest 67. The theme of the camp was the connection between Mathematics, Classical Music, Sanskrit Poetry and Algorithms. Sri Vinay Nair explained algorithms that were even 2300 years old and used binary logic for listing, sorting and generating permutations and combinations. Some of the participants who were good at programming wrote computer programmes for these ancient algorithms. The topic also gave an opportunity to discuss some fundamental theorems in number theory based on which many of the algorithms worked. It was interesting to see how students could pick up college level Mathematics even at school level when presented in a non-routine way of mixing Mathematics with other branches of studies.
